

DISCRIMINATIVE STIMULUS

- "Sd" or "discriminated operant"
- Signals the availability of reinforcement
- An operant that occurs under some antecedent conditions than others

I see my water bottle on my desk during a break and take a sip. **The sight of my water bottle was the Sd.**

MOTIVATING OPERATION

- "MO"
- Alters the reinforcing effectiveness of a stimulus and alters the current frequency of behavior that has been reinforced by that stimulus

I just ran a 5k and didn't take a single sip of water! **The value of water has just significantly increased.**
